## Code:

```
#include "stdafx.h"
#include<iostream>
using namespace std;
//int main()

int _tmain(int argc, _TCHAR* argv[])
{
    cout<<"hello"<<endl<<"world"<<endl;
    system("pause");
    return 0;
}
```

## ***Output:***

A screenshot of a Windows command prompt window. The title bar at the top reads "Select C:\Users\fjwu\Documents\Visual Studio 2010\Projects\ajeeb\Debug\ajeeb.exe" and includes standard minimize, maximize, and close buttons. The command prompt itself has a black background with white text. It displays the output of a program: "hello" on the first line, "world" on the second line, and "Press any key to continue . . ." on the third line, followed by a small white cursor. The window is partially obscured by a grey bar on the right side.

```
Select C:\Users\fjwu\Documents\Visual Studio 2010\Projects\ajeeb\Debug\ajeeb.exe
hello
world
Press any key to continue . . .
```
